ICTMC 2024

7th International Clinical Trials Methodology Conference.
Edinburgh. UK
30 Sep - 3 Oct

Workshop 1.4 Overview

Implementing CDISC's SDTM within an academic CTU

Ms Sharon Kean; Mr Jonathan Gibb, University of Liverpool

Come along and join us to learn to talk basic CDISC terminology! Do you want to learn to talk the talk and participate in some practical, hands-on advice about how to map an existing trial CRF to a SDTM dataset?. Yes? This is the workshop for you.

The group presenting will provide the opportunity to discuss how collecting data in a uniform way could create efficiencies within data management and standardise statistical programming, and to answer any questions about their experiences.
